

Great distances meet
greater power.

Solis Energy's solar and uninterruptable power solutions are an inexpensive way to protect your very expensive infrastructure. Our products give you the reliable power to monitor and control your SCADA and telemetry systems. Perfect for industries, including pipelines, refineries, and water treatment facilities, covering long distances without access to a reliable power source.

- Remote Telemetry Units
- Flow Controls and Sensors
- Pipeline Monitoring and Automation
- Data Transmission
- Data Collection
- Security and Surveillance

KEEP THE CONNECTION

Solis Energy's outdoor **Uninterruptible Power Supply (UPS)** systems are an ideal solution for your short-term, outdoor emergency battery backup power in the event of a brownout, blackout, power dip or surge.

CUT THE CORD

Solis Energy's **Solar Power Plant (SPP)** delivers immediate, reliable solar-generated electricity to your remote applications - anytime and anywhere. Ideal for use where there is an absence of available commercial power.

BRIDGE THE GAP

Solis Energy's **Continuous Power Bridge (CPB)** provides continuous, uninterrupted power to devices such as surveillance cameras or Wi-Fi radios attached to parking lot or street lights that do not have power during the day.

TAP INTO IT

Solis Energy's **Light Pole Power Tap (LPT)** provides easy access to AC power from a streetlight. It simply installs between the photocell and the light to provide power for many applications, including Wi-Fi radios and surveillance cameras.

POWER WHEN YOU NEED IT.
