UNISOL International Joins Solis Energy Distributor Program

Orlando, Fla. – Solis Energy, a manufacturer of outdoor power systems, announced today UNISOL International, a value-added Total Solution Distributor focused in IP Technology Solutions, has joined the company's distribution program as an international distributor to the Americas. Through this partnership UNISOL will expand the reach of Solis Energy's critical power solutions through the United States, Caribbean, Central and South America.

"As demand for deploying critical infrastructure in challenging locations, it is vital we have Industry partners that can supply technical and installation support and products to resellers and end customers," said Solis Energy president Robert Reynolds. "UNISOL is a welcomed addition to our sales model, and we look forward to working with them."

As the security and telecommunications industries integrate evolving megatrends like industrial IoT, critical infrastructure security and public safety, customers are looking for high reliability and the ability to install equipment anywhere. Solis Energy offers a suite of power systems and accessories, and coupled with UNISOL's inventory of quality products, skilled global logistics and customer service, they create a total premiere solution.

"Carrying Solis Energy products not only increases our product offering, but it extends the commitment we make to our channel to bring them total solutions," said UNISOL CEO Alberto Jessurun. "Solis Energy makes the most reliable outdoor power solutions for critical applications."

While project planning is still underway, Solis Energy will be attending UNISOL's IPTech Day Technology Roadshow in South Florida on March 2, 2017. For more information, visit www.SolisEnergy.com or www.UNISOLInternational.com.

About Solis Energy

Solis Energy, Inc. is a manufacturer of outdoor power systems for the industrial automation and control, transportation, telecommunication, security, and government markets. The company's products include solar generators, outdoor battery backup systems, and a suite of power management components including PoE injectors, DC to DC converters, and remote monitoring equipment.

About UNISOL International

Headquartered in Miami, Florida, UNISOL offers IP networking technologies and complete end-to-end solutions through distribution channels, with resellers and integrators in the US, Latin America and the Caribbean.
