

STAY CONNECTED, ANYTIME AND ANYWHERE.

Demand for Internet access continues to grow requiring expansion of wireless data communications. Even with innovations and enhancements being added to telecom devices, access to power is still critical. Solis Energy's solar and battery backup solutions can give your outdoor wireless applications power even in the most remote locations.

- Wireless Internet Service Providers
- Enterprise / campus networks
- Smart cities and municipal infrastructure
- Fixed wireless broadband
- Microwave and mmWave backhaul
- Fiber extension via wireless

POWER WHEN YOU NEED IT.
