

Seamless Power For A New Perspective on Surveillance

Key Benefits

1 Continuous Power

Solis Energy's power systems ensure Hanwha Vision cameras operate 24/7.

2 Seamless Integration

Solis Energy's power systems integrate effortlessly with Hanwha cameras facilitating uninterrupted surveillance.

3 Flexible Deployment

The integration allows camera systems to be deployed in diverse environments (urban, rural, industrial) without concern for grid power quality or availability.

Products

Uninterruptable Power Supply

Solis Energy's UPS provides your grid-powered applications with reliable backup battery power.

Solar Power Plant

Solis Energy's SPP delivers reliable solar generated electricity - anytime and anywhere.

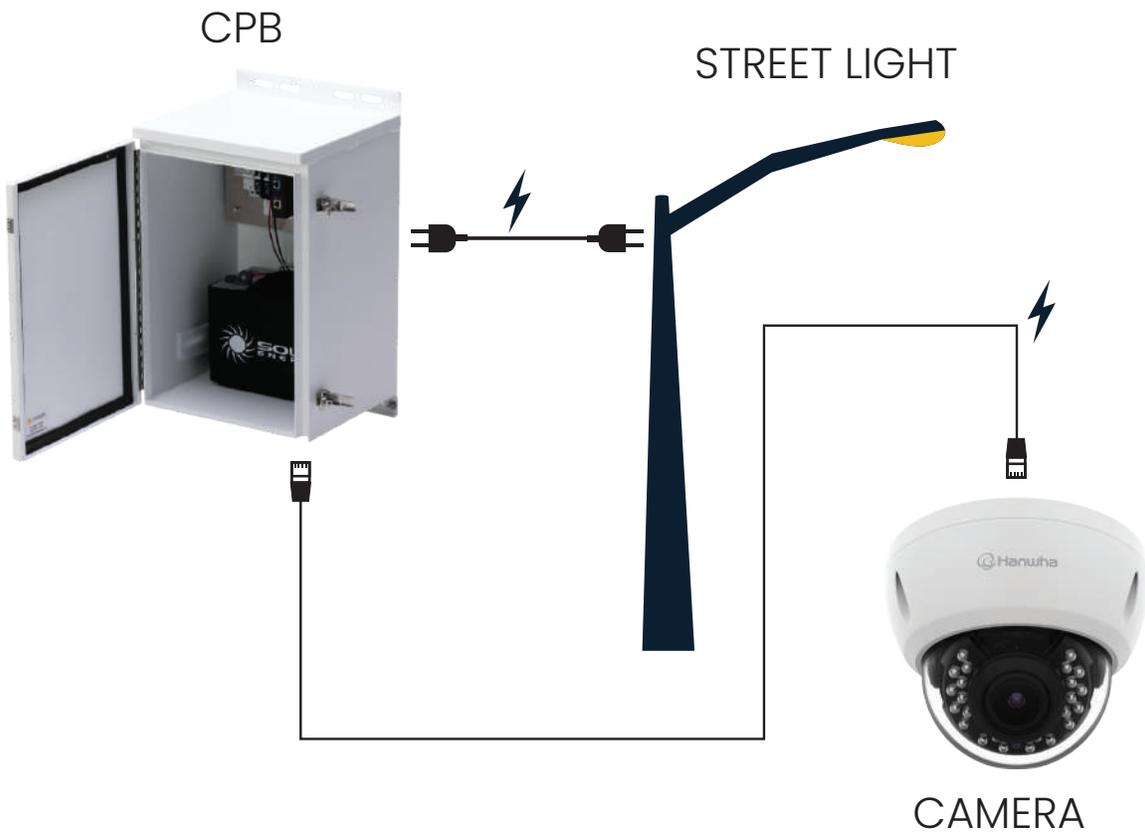

Continuous Power Bridge

Solis Energy's CPB is the optimal power solution for security cameras installed on light poles that only have power at night.

Continuous Power Constant Vigilance

Solis Energy's power systems connect seamlessly to Hanwha cameras, facilitating active monitoring 24/7. Whether it's monitoring critical infrastructure, construction sites, or commercial perimeters, this solution eliminates the need for costly power installations and allows for easy setup in diverse environments.
