

# DETECT LEAKS BEFORE THEY BECOME INCIDENTS.

## CRITICAL INFRASTRUCTURE PROTECTION: Pipeline Inspection & Leak Detection

**P**ipeline infrastructure requires continuous inspection to identify leaks, monitor equipment, and maintain safe operation. Across distributed and often remote environments, maintaining visibility is critical for detecting methane or hydrocarbon leaks and ensuring system integrity. Solis Energy helps keep inspection and monitoring systems online — supporting reliable oversight across pipeline networks.

## SOLUTION BENEFITS

- Leak detection and monitoring
- Inspection of critical components
- Thermal monitoring capabilities
- Reliable power in remote locations
- Continuous infrastructure visibility

**POWER WHEN YOU NEED IT.**
