

RELIABLE POWER KEEPS PUBLIC WI-FI ONLINE.

PUBLIC INFRASTRUCTURE CONNECTIVITY: Park WiFi & Outdoor Connectivity

Public WiFi in parks and outdoor spaces depends on infrastructure that is often exposed to inconsistent or limited power. When power drops, connectivity is lost — impacting users, safety systems, and overall experience. Solis Energy helps keep wireless networks online, supporting reliable connectivity across parks, trails, and public spaces.

SOLUTION BENEFITS

- Consistent connectivity
- Reliable power in outdoor environments
- Reduced network downtime
- Flexible deployment
- Supports public safety and communication

POWER WHEN YOU NEED IT.
