

CASE STUDY:

Large-Scale Event Security

Since 1947, the City of Hollister, California has hosted its annual **Independence Day Motorcycle Rally**, attracting thousands of visitors and creating **unique public safety challenges** across a large temporary event footprint. To support a **multi-tiered security deployment** for the rally, Solis Energy provided a layered approach to powering and protecting mission-critical equipment. SPP Solar Power Plant **seamlessly powered cameras and networking equipment** in retro-fitted police SUVs, ENC-B Enclosures **housed cameras and radars** with traffic analytics software, and CPB Continuous Power Bridge **provided reliable, continuous power** to AI-powered firearm-detection equipment. As a critical infrastructure enabler, Solis Energy supplied the resilient outdoor power and protection platforms that allowed SurveillanceGrid's innovative security technologies to operate reliably wherever they were needed — ensuring a safe and successful multi-day event.

THE CUSTOMER

The City of Hollister, CA

THE CHALLENGE

To power and protect a flexible security deployment for a large-scale, multi-day event

THE SOLUTION

Solis Energy's SPP powered a mobile surveillance platform, ENC-B housed traffic analytics equipment, and CPB powered AI-threat detection technology

THE RESULTS

Reliable operation of integrated security technologies ensuring improved public safety and event coverage

POWER WHEN YOU NEED IT.

INSIDE THE DEPLOYMENT

Cruiser Cam:

- Axis Q6358, Axis Q6300, Axis P3268 PTZ Cameras for 360° surveillance
- Starlink satellite Wi-Fi
- Solis Energy SPP (Solar Power Plant) for self-contained power platform

Intelligent Traffic Monitoring Station:

- Axis Q1686-DLE Radar-Video Fusion with intelligent sound/speed analytics and ALPR
- Energy's ENC-B Enclosure for mounting and protecting cameras, analytics hardware, and communications equipment

AI-Powered Firearm Detection:

- PTZ Camera with AI-powered firearm detection
- Solis Energy CPB providing continuous 24/7 power drawn from timer-controlled light poles
